Literature map: review draft

Source CSV: 31 papers. Blank cells mean unmarked, not confirmed absence. Categories are multi-label; cell counts must not be summed as unique papers.

CSV has no heading for the first group; configured label: Evaluation method. 12 papers have no marked attribute in Evaluation method; blanks remain unmarked.

Bibliography status: Using references.bib; see the accompanying bibliography audit for provenance and checks.

Table 1: Evaluation method vs Definition of sycophancy. Counts of papers with both attributes marked (N=31). Shade = count / N; papers can occur in multiple cells.

Evaluation method	**Hallucination Agreement**	**Bias Agreement**	**Obsequiousness**	**Stance Change**	**Failure to challenge/trying to get along**
Human - Specialist	1	2	1	0	3
Human - Authors	2	2	2	2	4
AI - prompted	2	2	1	3	6

Table 2: Evaluation method vs Definition of sycophancy. Citations for papers with both attributes marked; dash = no marked overlap.

Evaluation method	**Hallucination Agreement**	**Bias Agreement**	**Obsequiousness**	**Stance Change**	**Failure to challenge/trying to get along**
Human - Specialist	[8]	[20] [21]	[6]	—	[6] [8] [10]
Human - Authors	[4] [15]	[28] [29]	[14] [28]	[15] [30]	[7] [14] [26] [28]
AI - prompted	[3] [4]	[27] [31]	[1]	[2] [3] [27]	[1] [2] [3] [10] [13] [31]

Table 3: Evaluation method vs Outcomes. Counts of papers with both attributes marked (N=31). Shade = count / N; papers can occur in multiple cells.

Evaluation method	**None**	**User opinion**	**User action**	**System performance**	**User performance**
Human - Specialist	1	1	0	4	0
Human - Authors	3	1	1	4	0
AI - prompted	0	0	2	6	1

Table 4: Evaluation method vs Outcomes. Citations for papers with both attributes marked; dash = no marked overlap.

Evaluation method	**None**	**User opinion**	**User action**	**System performance**	**User performance**
Human - Specialist	[6]	[20]	—	[8] [10] [20] [21]	—
Human - Authors	[14] [28] [29]	[7]	[7]	[4] [15] [26] [30]	—
AI - prompted	—	—	[1] [13]	[2] [3] [4] [10] [27] [31]	[13]

Table 5: Definition of sycophancy vs Outcomes. Counts of papers with both attributes marked (N=31). Shade = count / N; papers can occur in multiple cells.

Definition of sycophancy	None	User opinion	User action	System performance	User performance
Hallucination Agreement	0	0	0	4	0
Bias Agreement	3	6	2	4	2
Obsequiousness	3	3	3	0	1
Stance Change	0	3	2	5	0
Failure to challenge/trying to get along	3	4	5	6	3

Table 6: Definition of sycophancy vs Outcomes. Citations for papers with both attributes marked; dash = no marked overlap.

Definition of sycophancy	None	User opinion	User action	System performance	User performance
Hallucination Agreement	—	—	—	[3] [4] [8] [15]	—
Bias Agreement	[24] [28] [29]	[9] [17] [19] [20] [23] [25]	[17] [19]	[20] [21] [27] [31]	[11] [17]
Obsequiousness	[6] [14] [28]	[17] [18] [19]	[1] [17] [19]	—	[17]
Stance Change	—	[12] [16] [18]	[12] [16]	[2] [3] [15] [27] [30]	—
Failure to challenge/trying to get along	[6] [14] [28]	[5] [7] [9] [16]	[1] [5] [7] [13] [16]	[2] [3] [8] [10] [26] [31]	[11] [13] [22]
